PROFESSIONAL SUMMARY

Data Analyst focused on data analytics and visualization using Python, SQL (MySQL), Excel, and Tableau. Experienced in end-to-end data pipelines including data cleaning, statistical analysis, KPI design, and interactive dashboard development. Strong focus on extracting business insights and supporting data-driven decision making.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: 6.5/10.0
Intermediate (Class XII)	2023 - 2024
Little World School	Grade: 64.0%
Matriculation (Class X)	2022 - 2022
Little World School	Grade: 83.6%

INTERNSHIPS

Salesforce and Software Developer	May 2025 - August 2025
Premium Learnings Systems	<i>Remote</i>
Researched and implemented AI tools to support the creation of a corporate learning course on practical AI adoption. Gained hands on experience with Salesforce by automating workflows and improving process efficiency.	

PROJECTS

Retail Revenue Intelligence (Github)	April 2026
Built an end-to-end retail analytics system to identify revenue drivers across categories, customers, and channels. Cleaned and transformed 12K transactional records; performed EDA and statistical analysis. Developed interactive Tableau dashboards (Executive, Customer, Sales) with dynamic filters. Impact: Enabled data-driven pricing, inventory, and customer strategy decisions.	
Cafe Sales Analysis (Github)	February 2026
Analyzed café transactional data to identify sales trends, product performance, and customer behaviour. Performed data cleaning, preprocessing, and exploratory analysis using Python (Pandas, NumPy). Built KPIs such as revenue trends, item performance, peak sales periods, and customer patterns. Impact: Improved decision-making for pricing, inventory planning, and menu optimization.	

CERTIFICATIONS

Visual Vortex 2.0 Google Developers Group Rishihood University (Link)	January 2026
Won 1st place at Visual Vortex 2.0, a UI/UX-focused hackathon centered on end-to-end product thinking. Developed a complete product concept from zero—defining the problem, ideating solutions, and translating them into structured user flows and high-fidelity interfaces. Designed UI/UX from scratch, created a cohesive design system, and produced an investor-ready pitch and presentation. Evaluated and selected an appropriate tech stack aligned with scalability and feasibility constraints. Delivered a clear, defensible narrative linking user needs, design decisions, and implementation strategy.	

SKILLS

Computer Languages: Python, NoSQL, CSS, JavaScript, SQL
Data Tools: NumPy
Software Packages: Pandas, Figma, MySQL, React, Excel, MongoDB
Soft Skills: Critical Thinking, Communication Skills
Others: Matplotlib, seaborn, UI/UX, Tableau

EXTRA-CURRICULAR ACTIVITIES

- Built complete data pipelines from raw data → cleaned datasets → insights → dashboards. Applied statistical methods to validate business hypotheses. Designed interactive dashboards for stakeholder decision-making.

- Built an end-to-end **student data collection system** that made onboarding information easily accessible for the academics team. **Streamlined data flow and improved data availability**, enabling faster and smoother student onboarding.
- Social Media Growth – Led 80% of content strategy and reel creation, increasing views from 2K–4K to **11K, 291K, 743K, 946K** through **trend analysis, data-driven optimization, focusing on trend analysis and audience engagement**.
- Volunteer – Managed a Soul trek for **800 students** by tracking attendance, schedules, and logistics data. Identified patterns in movement and resource usage to **optimize planning, reduce delays, and ensure smooth coordination**.
